Fat Cats

Probably one of the best-known expressions of the past was "fat and sassy." With all the good and highly-seasoned food that is usually in abundance, the term could easily be changed to "fat and dead."

This is not a pleasant thought, nor is it one which anyone would care to dwell upon, but the fact remains that more and more men are dying of heart trouble—often in the prime of life.

The most prominent cause—over-eating.

The dietary habits of the average college student are not good, either, and it usually proves to be the wrong kind of food, with little nutritional value.

Many doctors and scientists say that this is due to a diet containing too much edible cholesterol and fat in combination with high-starch foods.

The average woman in this country lives seven years longer than her mate. The older a man grows, the worse his prospects look.

By the time he is 40, his life expectancy is poorer than that of men in "less civilized" societies. And at 50, his chances of living another 10 years become dark indeed.

A quick sandwich and a soft drink, or a bar of candy and iced tea do not lend themselves to better physical health.

Remember, a woman can expect on the average to live to 72. But, for the poor man, the expectation is 64—if he's lucky.

Generally speaking, people who are 15 per cent overweight have a death rate 23 per cent higher than people of normal weight.

Those whose weight is 25 per cent above normal have a death rate of 75 per cent higher.

The one way to combat this is to set a strict diet and stick with it.

Absent Or Ignored

When a university has been operating for fifty years, it seems as though some traditions would have been established.

But what tradition do you see at West Texas State University?

There is no tower that changes color when the institution is ascribed for achievement—in the field of sports or scholarship.

There is no symbolic bench upon which only a graduating senior may rest.

There are no hallowed statues on campus before which a student may pause and reflect.

What are the WTSU traditions? Where are they?

In colleges and universities throughout the country, there are special rules and regulations regarding tradition which give the institution a flint to it, and a future. A new freshman or transfer student quickly introduced to these traditions.

Are WTSU's traditions absent or ignored?

Lost Letters

Throughout the history of this institution and its student publication, THE PRAIRIE, the voice of the student body has rung clear throughout these halls.

This year, no one seems to want to take the time or effort to voice their views on matters of student concern.

Is it possible that the student body has lost interest in their campus? Are WTSU's traditions absent or ignored?

Executive Director of West Germany's "Aktion Gemeinsinn," an organization similar to the Advertising Council in the United States, will speak Oct. 16 at West Texas State University.

Elizabeth Strauss, who heads "Operation Community Spirit," is touring the United States through the auspices of the Federal Press Office of the Bonn government. She will appear Oct. 15 at Fort Worth College, and at 16 and 18 October in the Administration Auditorium at WTSU.

"Aktion Gemeinsinn" was organized in 1954 and has objectives resemble those of the Advertising Council. It seeks to educate the German citizen for a democratic way of life, and individual initiative in public affairs. Advertising agencies and the mass media of West Germany assist in programs adopted by the organization.

Among the campaigns espoused by "Aktion Gemeinsinn" have been appeals for Germans to vote for free elections from other countries into their homes; appeals to women to do voluntary social work in hospitals; campaigns for the aged and safety campaigns.

Seven choral numbers by Dr. Houston Bright, director of choirs, are among the a cappella numbers which make up "64 and Before," West Texas State University Chorale's new 12-inch Monaural record.

Serum Available At Health Center

An influenza serum is now available for the West Texas State University students in the University Health Center. The price is $1.00 per shot and there are two shots in the series.

"Students under 21 years of age must have the written consent of their parents to be eligible for these shots," according to Dr. Bright, director of the University Student Health Center.

The Center will be open between the hours of 7:30 a.m. and 4:00 p.m. Monday through Friday and from 7:30 a.m. until noon on Saturdays.

NOTICE

Signups for those wishing to help plan social activities for the Student Union Board will end today, according to Bill Callahan, SUB president.
